New Students **Want to Know**

- What are my career options?
- What are the education paths to those careers?
- What will I need to take?
- How long will it take and how much will it cost?
- Will my credits transfer?
- Who can I talk with to get good information?

Graduation Requirements

- A. Satisfactory completion of 60 units of collegiate work:** Must earn an overall 'C' (2.0 grade point average) in a curriculum that LRCCD accepts toward the degree & meet Graduation Competency Requirements (see Table 1 below). At least 12 units must be earned at Cosumnes River College.
- B. Major:** Complete one of the degree programs listed in this catalog with a minimum of a 'C' grade in each course for the CRC major.
- C. Demonstrate Graduation Competencies,** as listed in Table 1 below.
- D. Complete General Education (GE) requirements** listed in Table 2 below.
- E. Complete Ethnic/Multicultural Studies** as listed in Table 3 below. Courses approved for General Education may also be used to satisfy this requirement. See courses marked with a "*" in Table 2.

TABLE 1: GRADUATION COMPETENCY REQUIREMENTS

Demonstrate college-level competence in reading, in written expression and in mathematics by completing the following:

- 1. Reading Competency - a.** Completion with a grade of 'C' or better in ENGRD 200, 310 or 312 or an equivalent college reading course at a regionally accredited college **OR** Obtain a satisfactory score on a college level reading examination administered in the Los Rios District. **OR b.** Complete either CSU-GE Breadth or IGETC; **OR c.** Students who possess an AA/AS degree or higher shall be deemed competent in reading.
- 2. Written Expression Competency -** Completion with a grade of 'C' or better in ENGWR 300, ENGWR 480, ESLW 340, HONOR 375, or BUS 310 or an equivalent course at an accredited college.
- 3. Mathematics Competency - a.** Completion with a grade of "C" or better in MATH 110, 120, 125, 144, OR designated higher level mathematics/statistics course, OR ECON 310, OR PSYC 330, OR college math course at a regionally accredited college. **OR b.** Obtain a satisfactory score on a mathematics competency examination used district-wide for graduation.

Note: Effective beginning summer 2004, students who possess a BA/BS or higher degree from a regionally accredited college or university in the United States are deemed to have met the General Education and Graduation Competency Requirements for an AA/AS degree.

THE STUDENT EXPERIENCE

A photograph of two students, a young man and a young woman, sitting on a white ledge or bench. The young man is on the left, leaning back against the wall and looking out a window. The young woman is on the right, sitting upright and looking towards the young man. A backpack and some papers are on the ledge between them. The scene is brightly lit by natural light from the window.

Start with the End in Mind

- Market program paths
- Build bridges from high school and adult ed. into program streams (e.g., strategic dual enrollment, I-BEST)

- Require exploratory or “meta-majors” for undecided students
- Integrate basic skills instruction into introductory college courses

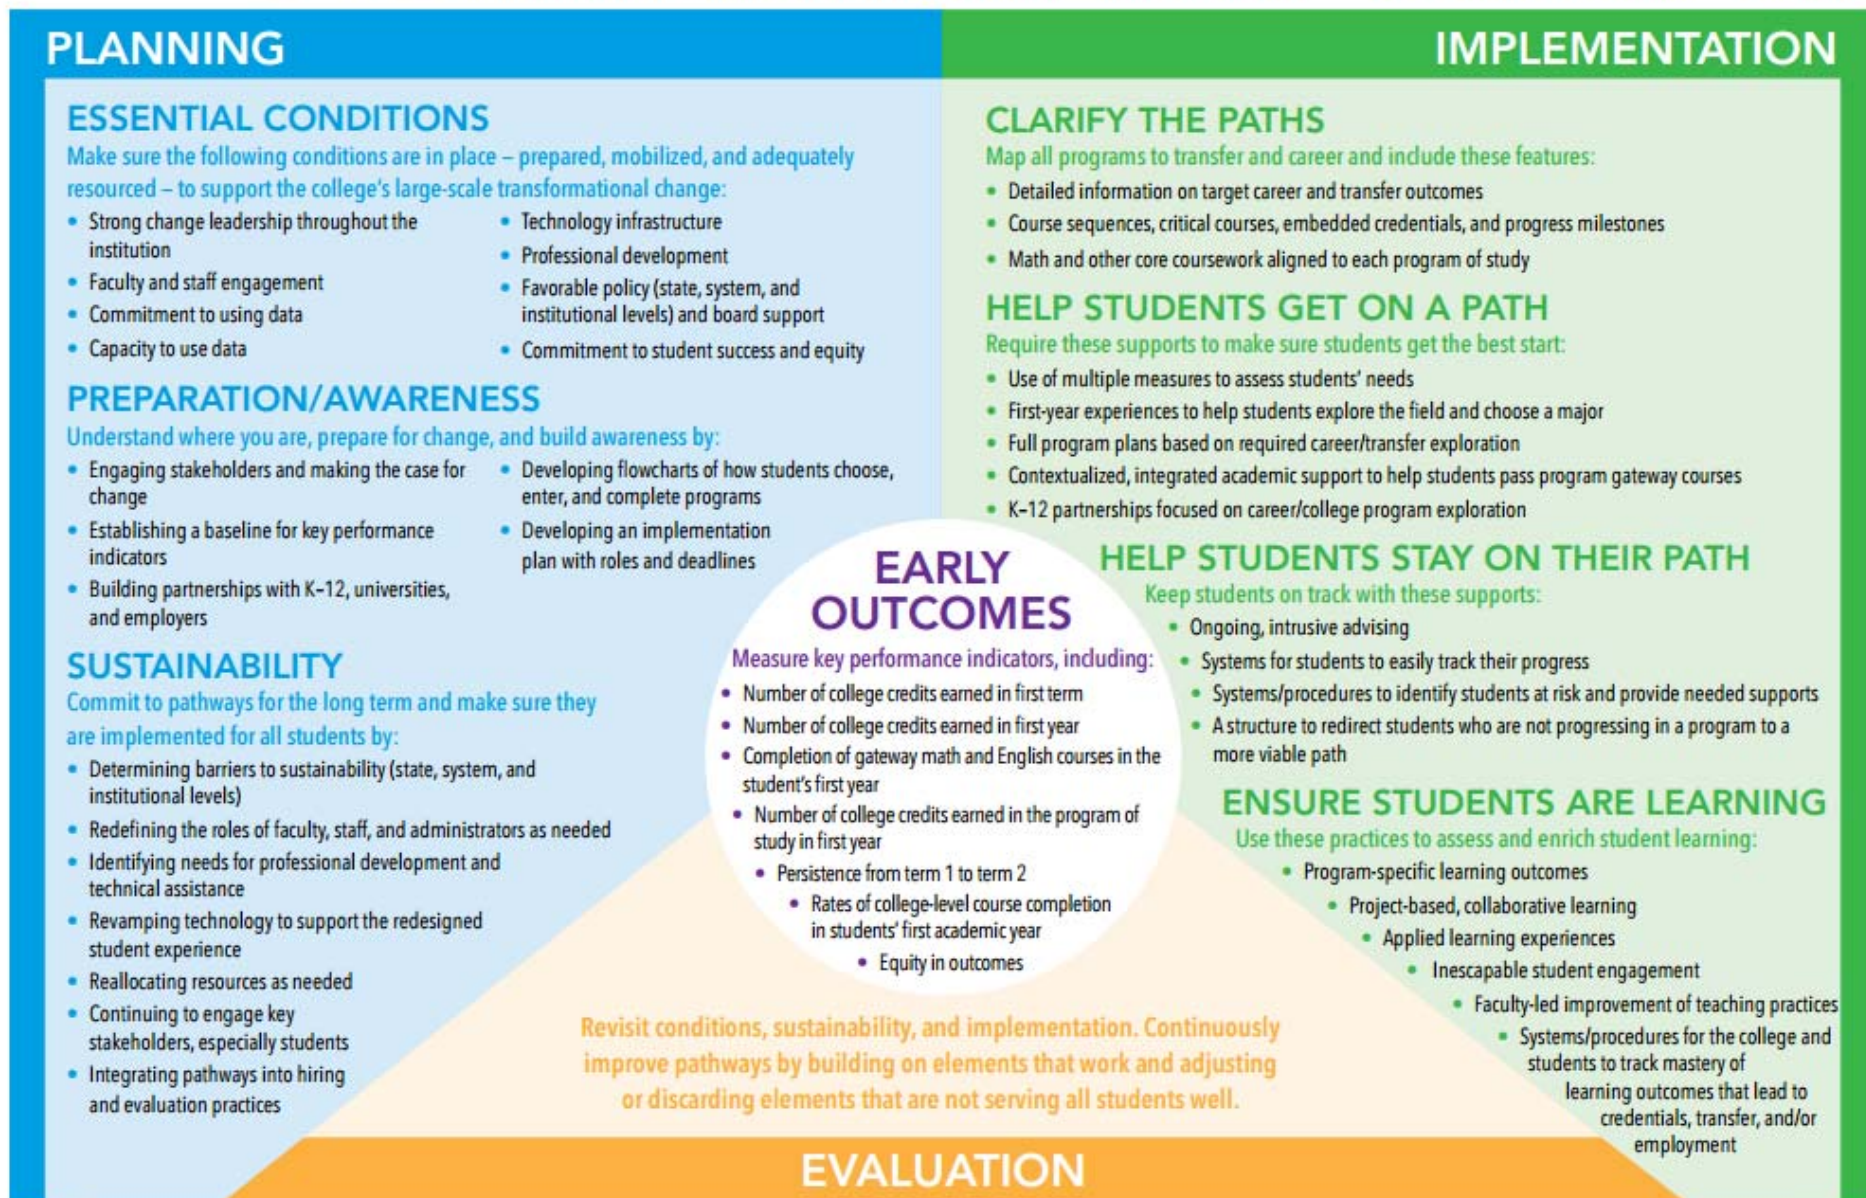

- Clearly map out program paths
- Rethink advising around maps
- Use “eAdvising” to monitor student progress, provide feedback and support as needed

- Align program outcomes with requirements for success in further education and the labor market

Guided Pathways: Planning, Implementation, Evaluation

Creating guided pathways requires managing and sustaining large-scale transformational change. The work begins with thorough planning, continues through consistent implementation, and depends on ongoing evaluation. **The goals are to improve rates of college completion, transfer, and attainment of jobs with value in the labor market — and to achieve equity in those outcomes.**

Guided Pathways Scale of Adoption

CCRC COMMUNITY COLLEGE RESEARCH CENTER
TEACHERS COLLEGE, COLUMBIA UNIVERSITY

Institution: _____

This tool is designed to help institutions assess the adoption of Guided Pathways Essential Practices. The tool is organized into three main sections: 1. Mapping, 2. Helping, and 3. Keeping. Each section contains a list of practices and a corresponding table for tracking adoption and implementation steps.

1. MAPPING

a. Every program has a clear purpose for students seeking further education.

b. Detailed maps of the college's programs are available to students and faculty.

c. Program maps are updated and revised as needed to reflect changes in the college's offerings.

2. HELPING

a. Every student has a clear path to success.

b. Specialized support is provided for students who need it.

c. Required courses are aligned with the college's mission and vision.

d. Interdisciplinary learning opportunities are available to students.

e. The college provides a variety of support services to help students succeed.

3. KEEPING

a. All programs are regularly evaluated for quality and effectiveness.

b. Student feedback is used to improve programs and services.

c. Academic advisors are trained to help students navigate the college's offerings.

d. Assessment results are used to inform program improvement efforts.

e. The college tracks mastery of learning outcomes by individual students, and that information is easily accessible to students and faculty.

Search by Interest — Choose Your Meta Major

Computer Information Technology

Are you ready for a well-paying career in a rapidly growing worldwide industry? You'll focus on the latest advances in network security and web development, IT support and related fields. You'll study computer programming and develop web programming skills to design and maintain websites using Dynamic HTML, XML and scripting languages.

Continue with a Bachelor's Degree in IT Management and Cyber Security to gain advanced skills in building, operating and maintaining computer networks and ensuring the safety and security of the data moving through these networks. You will be ready to manage the technology and people associated with IT operations.

- **A.A. Degree** — Complete your first two years of college at IRSC, and you're guaranteed the right to transfer as a junior to a Bachelor's program at a Florida state university — or continue to a Bachelor's degree at IRSC.
- **A.S. Degree** — Gain management and technical skills in many high-demand career fields, with the option to continue toward a Bachelor's degree at IRSC.
- **Technical Certificates** — Earn valuable Technical Certificates at the same time you're completing an A.S. Degree — get double the value and additional credentials by completing these blocks of courses.
- **Bachelor's Degree** — Increase your earning power and build on your Associate Degree with more than twenty 2+2 Bachelor's Degree options at IRSC.

BIOLOGICAL SCIENCES PROGRAM

It will be the convergence of evolutionary biology, developmental biology and cancer biology that the answer to cancer will lie. -Paul Davies, Physicist, Astrobiologist and Arizona State University Professor

What are the Biological Sciences?

Finding a cure for cancer is just one of the important scientific breakthroughs that the Biological Sciences are uniquely poised to make. Involved in the study of living organisms, the Biological Sciences include neurobiology, ecology, astrobiology, microbiology, botany and zoology among the many branches. Through laboratory and field research, the Biological Sciences help us better understand and adapt to the natural world.

The Biological Sciences Program at Macomb

The Biological Sciences Program at Macomb provides you with the basic competencies, knowledge and skills necessary to transfer to a Bachelor's Degree Program in Biological Sciences.

Biological Sciences Courses at Macomb

In Macomb's Biological Sciences Program, your required courses will include:

- General Biology 1 & 2
- General Chemistry 1 & 2
- Analytic Geometry & Calculus
- General Microbiology
- College Physics 1 & 2
- Organic Chemistry 1 & 2

Career Opportunities with an Associate of Science Degree in Biological Sciences

With an Associate of Science Degree in Biological Sciences, you will be qualified for positions that include biotechnologist, medical & clinical laboratory technician and environmental technician.

Transfer Pathways to Advanced Degrees in Biological Sciences

Career opportunities in the Biological Sciences increase at every level of education you complete, with a doctoral degree required for work as a Biological Scientist engaged in independent or academic research. The credits earned in Macomb's Program transfer to many colleges and universities in Michigan.

If you intend to transfer and pursue advanced degrees in Biological Sciences, speak with a Macomb counselor or academic advisor as soon as possible after you have applied to Macomb to plan the best pathway.

How do I find out more about Macomb's Biological Sciences Program

For more information about the Biological Sciences Program at Macomb, contact the Associate Dean at Center Campus: 586.286.2147 or AandS.center@macomb.edu, or at South Campus: 586.445.7354 or AandSsouth@macomb.edu.

CAREER OPPORTUNITIES

Begin your adventure with an Associate of Science Degree that will give you the basic knowledge and skills essential to transfer to a baccalaureate degree program.

Biological Sciences — Associate of Science

Job titles such as Biotechnologist, Medical and Clinical Laboratory Technician, and Environmental Technician are attainable upon completion of this course of study.

To learn more from a career specialist, visit the Office of Career Services at either campus or explore online at www.onetonline.org

America's Career Infonet (www.acinet.org) identifies dozens of occupations for which a science student may qualify. They include:

- Natural Sciences Manager
- Agricultural and Foods Sciences Technician
- Life, Physical and Social Sciences Technician
- Food Scientist and Technologist
- Atmospheric and Space Scientist
- Conservation Scientist
- Hydrologist
- Physicist
- Biochemist and Biophysicist
- Aerospace Engineer
- Health and Safety Engineer
- Medical Scientist
- Chemist
- Environmental Scientist

EMPLOYMENT OUTLOOK

Career choices in this field will be influenced by a student's chosen path of study. With an associate degree in life sciences from Macomb, you will be qualified for careers including lab assistant. Median salary for these careers is \$41,510 in Michigan with 11 percent growth in openings expected through 2024. Continuing your education and earning a bachelor's degree will qualify you for careers like science teacher, biological technician, and environment health and safety specialist.

Two years at Macomb equals a tremendous savings—about \$18,000—compared to attending a Michigan four-year public university. 80 percent of our students leave DEBT FREE!

Your answer

Business Administration

Recommendation: MATH 1324 (Math for Business)

Rationale: This course transfers and applies to associated programs.

Comments:

- Results of the survey indicated that a blend of MATH 1332 (Math for Liberal Arts) would not serve students well in transfer.)

Business Management

Recommendation: MATH 1324 (Math for Business)

Rationale: This course transfers and applies to associated programs.

Comments:

- Results of the survey indicated that a blend of MATH 1332 (Math for Liberal Arts) would not serve students well in transfer.

Business Office Technology

Recommendation: MATH 1332 (Math for Liberal Arts)

Rationale: This course was overwhelmingly favored by program faculty.

Comments:

- These are terminal technical credentials, so transfer is not an issue.

Chemistry

Recommendation: MATH 1314 (College Algebra)

Rationale: Students must take physics as part of their program.

Comments:

- According to survey, faculty in this program favor Elementary Statistics and Math for Liberal Arts.

Computer Information Technology

Recommendation: MATH 1332 (Math for Liberal Arts)

Rationale: Program faculty identified skills in MATH 1332 as the most appropriate prerequisites for their program. This is a terminal credential, so transfer is not an issue.

Comments:

- Students seeking a bachelor's degree in related fields should take MATH 1314.

Computer Programming

Recommendation: MATH 1332 (Math for Liberal Arts)

Rationale: Program faculty identified skills in MATH 1332 as the most appropriate prerequisites for their program. This is a terminal credential, so transfer is not an issue.

Comments:

- Students seeking a bachelor's degree in related fields should take MATH 1314.

Computer Science

Recommendation: MATH 1314 (College Algebra)

Rationale: Bachelor's degrees in this subject in UH system require Calculus. Program faculty are in agreement that MATH 1314 is the most appropriate mathematics course.

Comments: None

Computer Simulation

Recommendation: MATH 1332 (Math for Liberal Arts)

Rationale: Program faculty identified skills in MATH 1332 as the most appropriate prerequisites for their program. This is a terminal credential, so transfer is not an issue.

Comments:

- Students seeking a bachelor's degree in related fields should take MATH 1314.

Early Childhood – 6 Education

Recommendation: MATH 1314 (College Algebra)

Rationale: MATH 1314 is a prerequisite for other mathematics courses in this program—specifically, MATH 1350 and MATH 1351. Additionally, both UH and UHCL require MATH 1314 for EC-6 education degrees.

Comments:

- UH Main does not accept MATH 1314 in this program. Such students need to take MATH 1332 (which transfers as MATH 1311 at UH Main). UH Main/Downtown does not accept MATH 1350 or MATH 1351 towards their teacher certification.

Engineering

Recommendation: MATH 1314 (College Algebra)

Rationale: This program requires Calculus, etc.

Comments: None

Engineering Graphics Design

Recommendation: MATH 1332 (Math for Liberal Arts)

Rationale: Program faculty identified skills in MATH 1332 as the most appropriate prerequisites for their program. These credentials are terminal so transfer is not an issue.

Comments: None

Geology

Recommendation: MATH 1314 (Math for Liberal Arts)

Rationale: MATH 1314 is a prerequisite for mathematics requirements for this program.

Comments:

- Program faculty selected skills from Elementary Statistics and Math for Liberal Arts instead of College Algebra skills; however, those courses would not allow students to make progress in this program.

Jackson College Student Planning

Using JetSTREAM to customize plan

What makes for a good plan?

- ✓ Covers *entire* program based on default program maps
- ✓ Customized for each student to account for:
 - **prior credits** (dual enrollment, transfer, AP, etc.)
 - educational **goals** and **personal interests**
 - **transfer** destination and major
 - **timeline** to completion
- ✓ Contains at least 1 program course in first term, and 3 program courses in first year
- ✓ Easily accessible by student, advisor, faculty
- ✓ Tied to scheduling/registration process and locked into student information system

All of the AACCC Pathways colleges are experimenting with new and promising approaches to developmental education...

...but with a couple of notable exceptions, they have not yet connected these efforts to their guided pathways reforms at scale.

- Examples:
 - Cleveland State Community College (TN)
 - Stanly Community College (NC)
 - Wallace State Community College (AL)

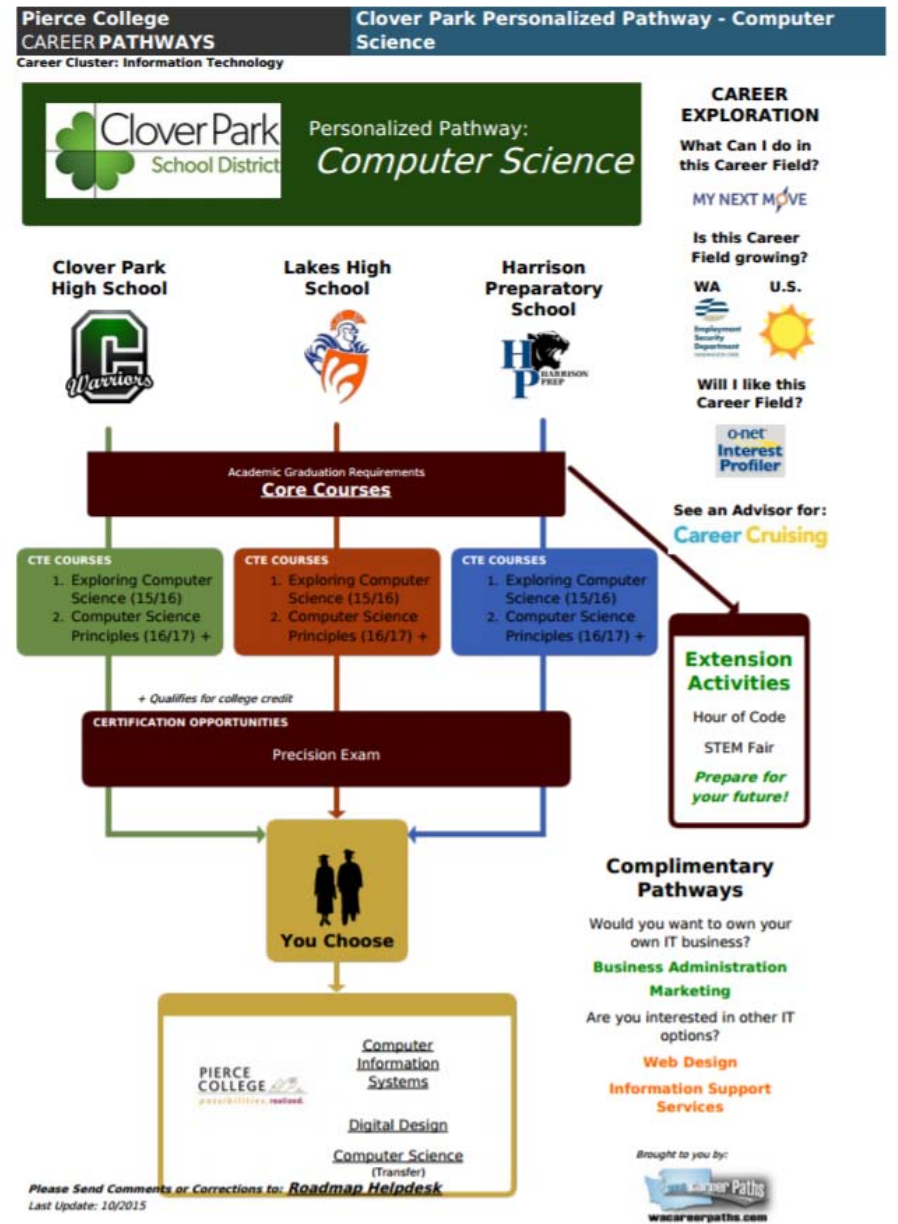

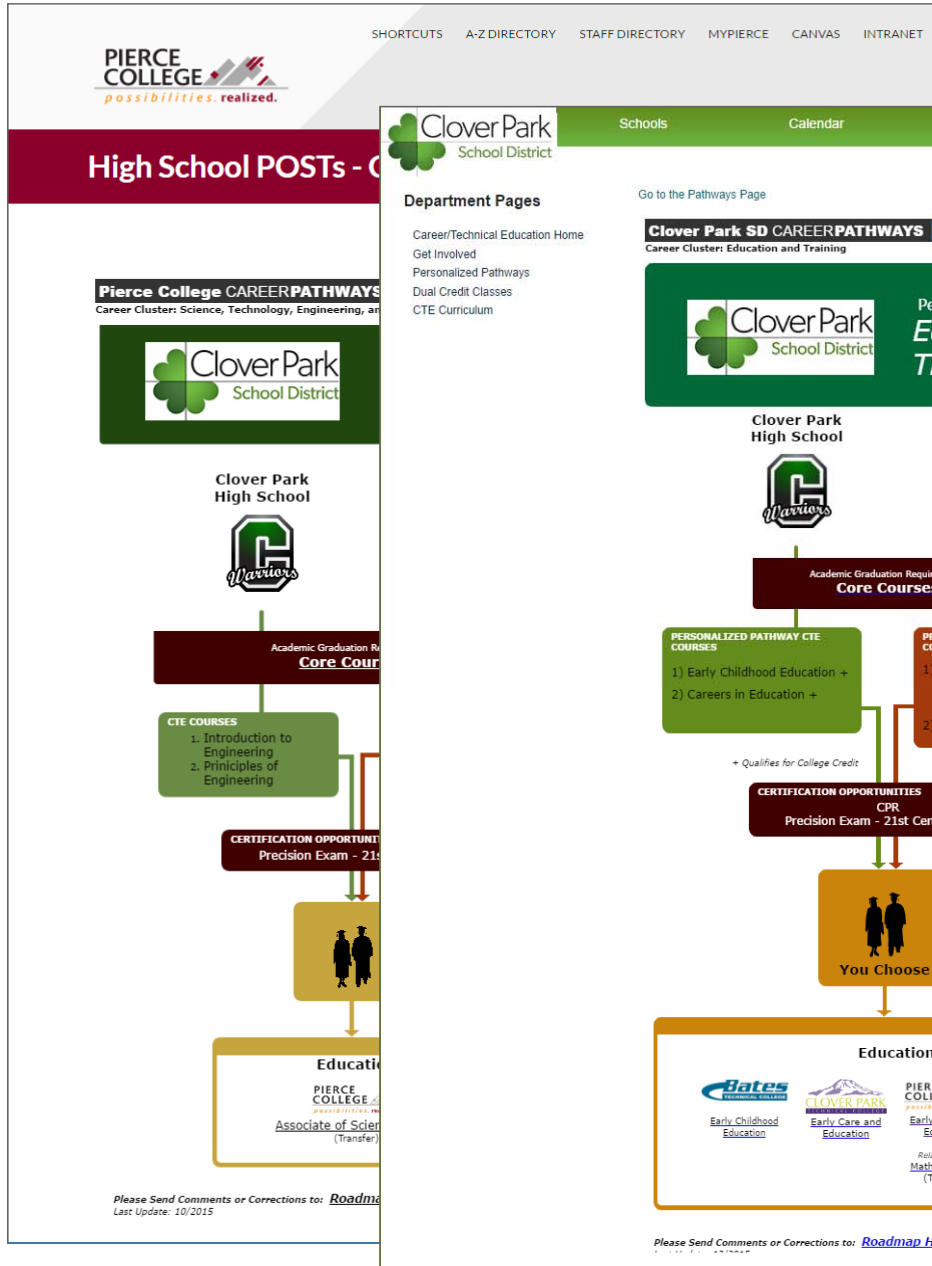

Early evidence of impacts

Cleveland State Community College (TN): Completion of Gateway Courses by FTEIC Students in 1 Year

AACC colleges are beginning to build pathways down into high schools, starting with dual enrollment students

- Examples:
 - Indian River State College (FL)
 - “Great Explorations”
 - Required SLS 1000
 - Build an academic plan
 - Columbus State Community College (OH)
 - College Credit Plus
 - Pierce College (WA)
 - Career cruising
 - Washington Career Pathways

Major Decisions Along the Path

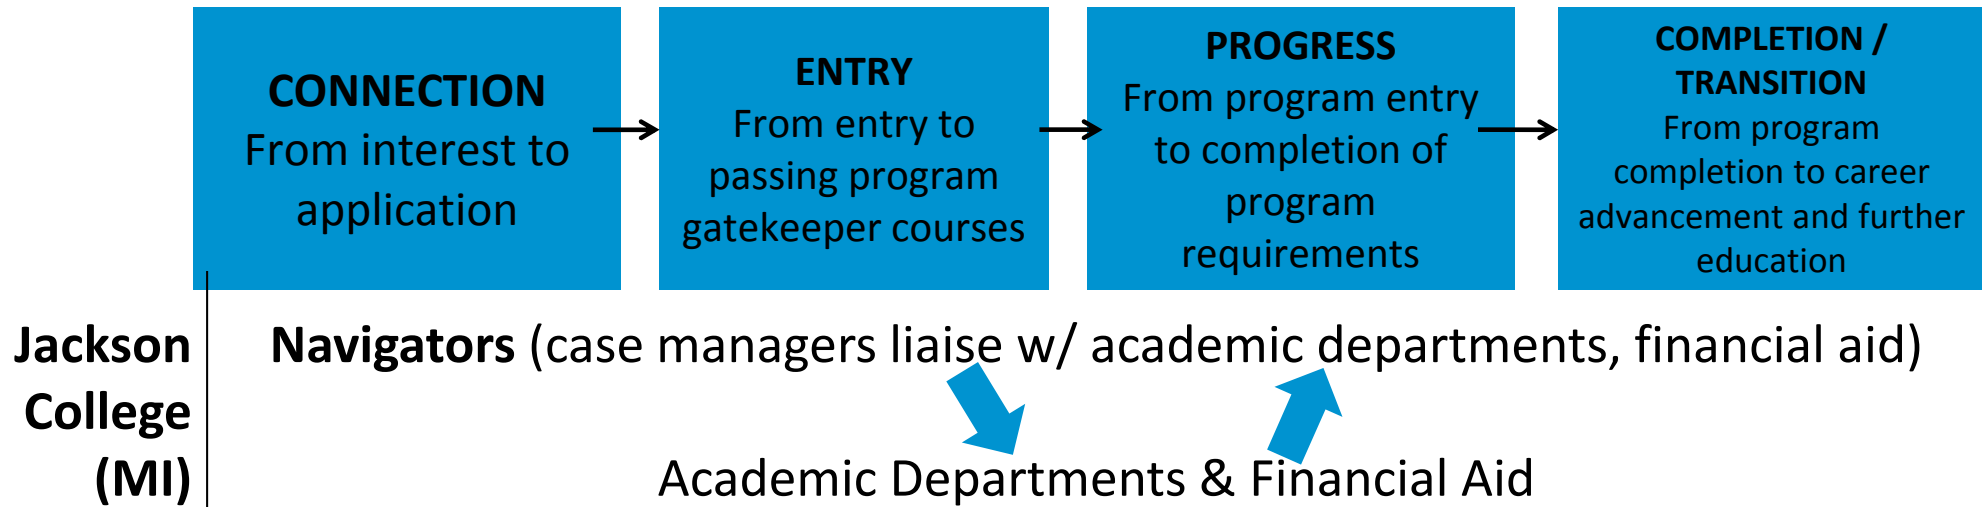

- What are my career options?
- Which college offers programs in my field of interest?
- How much will it cost and how will I pay?

- What are my program options?
- What are program requirements?
- Which program is a good fit?
- What will I take?
- Will credits transfer?
- How much time and money to finish?
- What if I change my mind about a major?

- Am I making progress?
- How do I get related work experience?
- What if I want to change majors?
- What if I am struggling academically?
- How much time and money to complete?
- How do I balance my other obligations?

- How do I transfer?
- How do I get a job in my field of interest?

Advising Redesign **Key Features**

- **Personal contacts early on**, so students feel welcomed and valued
- **Case management approach**, so that every student ideally has one advisor who is overseeing his or her progress throughout
- **Connection with faculty and others in their field of interest** to provide guidance and networking support
- **Responsibility for guiding students into and through program paths shared by all faculty and staff**, regardless of whether they have formal roles as advisors

Ensuring that students are **learning**

A handful of colleges are considering how to customize general education learning outcomes for broad meta-major fields.

- “Pathways can’t just be sequences of courses. They have to fit together to create an educationally coherent program...[Therefore] you need program learning outcomes for pathways in particular fields.” – Associate dean, IRSC.
- Contextualizing general education courses for career and academic communities (St. Pete College)
- Challenge: **Measuring and documenting learning outcomes mastery by individual students.**

Guided Pathways: Planning, Implementation, Evaluation

Creating guided pathways requires managing and sustaining large-scale transformational change. The work begins with thorough planning, continues through consistent implementation, and depends on ongoing evaluation. **The goals are to improve rates of college completion, transfer, and attainment of jobs with value in the labor market — and to achieve equity in those outcomes.**

Pathway Discussion Starters

- How well aligned are our programs with career and transfer opportunities in our region?
- How do we help students explore options and develop career, academic & financial plans?
- How well do we monitor student progress to ensure they are “on-plan”?
- How do we ensure that students are building needed skills across programs?

Exercise: Students by Program

- Does every one of these “programs” have clear job and transfer outcomes?
- How accurately does this reflect students’ goals?
- Do we know how far along each student is toward program completion? Do students know?
- How well do we track when students change?
- Who is responsible for students in each “program”?
- Are there students whose progress is not monitored?

Guided Pathways Scale of Adoption

CCRC COMMUNITY COLLEGE RESEARCH CENTER
TEACHERS COLLEGE, COLUMBIA UNIVERSITY

Institution: _____

This tool is designed to help institutions assess the adoption of Guided Pathways Essential Practices. The tool is organized into three main sections: 1. Mapping, 2. Helping, and 3. Keeping. Each section contains a list of practices and a corresponding table for tracking adoption and implementation steps.

1. MAPPING

a. Every program has a clear purpose for students seeking further education.

b. Detailed information is provided for each program.

c. Program success and student outcomes are tracked and reported.

2. HELPING

a. Every student has a clear path to success.

b. Specialized support is provided for students in the major field of study.

c. Required courses are aligned with the program's purpose.

d. Intervention and support are provided for students who are struggling.

e. The feedback loop is used to improve the program.

3. KEEPING

a. Admissions is aligned with the program's purpose.

b. Student support is provided for the program.

c. Academic planning is provided for the program.

d. Assessment is provided for the program.

e. The student's success is the primary focus of the program.
